Amit Vishwakarma

Senior Shopify Full-Stack Developer — Liquid, Storefront/Admin API, Theme App Extensions, React & Next.js

Bengaluru, India (open to remote) | +91 79997 15006 | amit.websitedev@gmail.com
linkedin.com/in/amit-vishwakarma-av7999 | github.com/AvTe | amitspace.cloud
Immediate joiner | Open to remote roles | Comfortable with US/EU overlap

SUMMARY

Shopify developer with 4+ years building, customizing, and optimizing high-performing eCommerce storefronts and apps for enterprise and DTC brands including Allbirds, Everlane, and Filson. Expert in Shopify theme development and Liquid templating — building custom sections, blocks, Theme App Extensions, and reusable front-end components from scratch — and extends functionality beyond standard Liquid using the Storefront and Admin GraphQL APIs, metafields, and metaobjects. Builds full-stack Shopify apps and headless storefronts with React, Next.js, and Node.js, backed by PostgreSQL/Prisma ORM and MongoDB; comfortable with webhooks, OAuth/API authentication, and Shopify CLI for app and theme deployment. Ramping on Checkout Extensibility (Checkout UI extensions, Shopify Functions) and Hydrogen/Oxygen headless storefronts. Integrates third-party apps and platform extensions, sets up payments/shipping/tax configuration, handles data migrations between legacy systems and Shopify, and drives page-speed, SEO, and CRO improvements — cutting page load 30–40% on client sites. Also brings WordPress, BigCommerce, and PHP/MySQL experience from migrating sites onto Shopify. Uses AI-assisted tools (Claude Code, Copilot, Cursor) to move faster without cutting corners on quality.

EXPERIENCE

Shopify Full-Stack Developer — TipTop Things Limited

Sep 2026 – Present
Hong Kong · Remote

- Build and maintain Shopify storefronts and custom apps end to end using **Liquid, React, TypeScript, Node.js, and the Shopify Admin & Storefront GraphQL APIs**.
- Develop custom theme sections, Theme App Extensions, and app backends with webhook handling and OAuth authentication.
- Build integrations between Shopify and external services over REST and GraphQL APIs for orders, products, and customer data.
- Improve storefront performance and Core Web Vitals, and troubleshoot production issues across theme, app, and integration layers.

Shopify Full-Stack Developer — Moshi Moshi, The Communication Company

Jun 2025 – Jun 2026
Bengaluru, India

- Build custom Shopify sections, blocks, Theme App Extensions, and reusable front-end components (Liquid, JSON templates) to enhance site functionality and UX for enterprise DTC brands.
- Extend theme functionality beyond standard Liquid using the Storefront and Admin GraphQL APIs, metafields, and metaobjects; build custom Shopify app backends and UIs in Node.js, React, and Next.js, with webhook handling and API authentication.
- Integrate and customize third-party apps and platform extensions within themes and checkout, alongside BigCommerce storefront work (Stencil framework, APIs) for cross-platform projects.

- Optimize storefront performance and Core Web Vitals to improve conversion; own Core Web Vitals work, cutting page load by roughly 30–40% on several client sites.
- Write clean, testable, well-documented code and participate in code review; debug production issues for reliability and scale, using AI-assisted workflows (Claude Code, GitHub Copilot, Cursor) alongside a consistent review bar.

Freelance Shopify Developer

Feb 2025 – Jun 2025 · Oct 2022 – Jun 2023 - Remote

Independent — Direct Clients & Agencies

- Owned complete project lifecycle solo for repeat clients based in the US and Europe — scoping, estimates, theme/frontend architecture, delivery, revisions, and handoff.
- Delivered custom Shopify theme work — Liquid, custom sections/blocks, Storefront GraphQL API — and BigCommerce storefront builds (Stencil, APIs); migrated sites from other eCommerce platforms onto Shopify.

Frontend Developer — Stellar8 Labs

Mar 2024 – Feb 2025
Remote – Indore, India

- Integrated frontend components with backend systems using REST and GraphQL APIs for ecommerce platforms, with attention to component structure and design-system consistency.
- Built responsive, accessible, high-performance UI with dynamic product and content rendering.
- Ran performance optimization, accessibility testing, and cross-browser debugging; documented technical decisions for team handoff.

Website Designer — GrayCyan

Jun 2023 – Feb 2024
Remote – Ontario, Canada

- Developed high-performance WordPress block themes and custom plugins (PHP, ACF) from UI/UX wireframes.
- Implemented a scalable CSS architecture using BEM + SCSS; shipped pixel-perfect layouts across devices.
- Enhanced engagement using modern animations and performance-focused UI.

Web Developer — Dime In Time Media LLC

Sep 2021 – Oct 2022
Bhopal, India

- Built and improved responsive websites with conversion-focused UI/UX for US-based clients.
- Delivered WooCommerce-based ecommerce solutions in PHP/WordPress, including custom theme/plugin work and performance improvements.

SELECTED PROJECTS

SHOPIFY & E-COMMERCE PROJECTS

Cowboy · cowboy.com
Shopify theme development and custom UI components; product/collection page builds with responsive layouts and Core Web Vitals optimization.

Bruvi · bruvi.com
Custom Shopify storefront work — Liquid templating, HTML/CSS/JS, and Storefront API (GraphQL) integration for product data rendering.

FULL-STACK & PRODUCT PROJECTS

Yoombaa, Live · yoombaa.com
MERN full-stack platform (React, Node.js, Express, MongoDB) with a shipped React Native mobile app in production. Owned schema design, REST API layer, auth, and frontend build.

Great Jones Goods · greatjonesgoods.com

Theme customization and variant handling for the storefront; accessibility and performance improvements on product pages.

Meow Meow Tweet · meowmeowtweet.com

Product and collection page development with custom UI components and responsive design.

Perfect White Tee · perfectwhitetee.com

Shopify theme build with variant/size-selection logic and mobile-optimized product pages.

Satya Organics · satyaorganics.com

Custom Liquid theme development and Storefront API integration for product/collection pages.

Allbirds · allbirds.com *(via Moshi Moshi)*

Optimized product/collection pages for Core Web Vitals (LCP, CLS); dynamic product rendering via Storefront API (GraphQL); customized theme components.

Everlane · everlane.com *(via Moshi Moshi)*

Responsive product pages and UI components; Storefront API (GraphQL) integration; improved variant handling and product display logic.

Filson · filson.com *(via Moshi Moshi)*

Shopify theme customization in Liquid, HTML, CSS, JavaScript; improved product-page accessibility.

SellFlow, Live — Founder & Full-Stack Developer · sellflow.bio

Free social commerce platform for creators — sell on Instagram, TikTok, and YouTube via a link-in-bio storefront. Next.js, React Native, Node.js APIs.

One-Click Maintenance Mode · GitHub

Custom Shopify app built on the Admin API with custom admin logic, for store maintenance-mode management and automation.

RefineAI · Chrome Web Store

Manifest V3 Chrome extension with AI-powered writing features. Supabase backend with RLS, Lemon Squeezy billing, HMAC-verified webhooks.

CleanCompress · Chrome Web Store

Published Chrome extension for compressing and cleaning up images directly in the browser.

DevStock · github.com/AvTe

Published VS Code extension for developer productivity.

GitAxis · github.com/AvTe/GitAxis

VS Code extension for Git workflow enhancement.

TECHNICAL SKILLS

Shopify: Liquid templating (expert), theme architecture (sections, blocks, snippets, schema), Online Store 2.0 (JSON templates, theme settings), Shopify Plus, Theme App Extensions, Storefront & Admin GraphQL APIs, Shopify JS APIs (AJAX Cart, Sections), metafields & metaobjects, Shopify Search & Discovery, Shopify Flow, Web Pixels API, Shopify CLI 3.x & Dawn, custom public/private app development, Webhooks, OAuth & API authentication, data migrations onto Shopify

Shopify (current focus): Checkout Extensibility — Checkout UI extensions & post-purchase (checkout.liquid migration), Customer Account UI extensions, Shopify Functions (discount, cart transform, delivery & payment customization), Hydrogen & Oxygen headless storefronts, Shopify Markets & B2B, Combined Listings & Bundles, Shopify MCP / agentic-commerce APIs

Other eCommerce Platforms: WordPress (custom theme/plugin development, ACF, WooCommerce), BigCommerce (Stencil framework, APIs)

Backend: Node.js, Express.js, Next.js 15 (App Router, API routes, Server Actions), Remix, PHP, RESTful & GraphQL APIs, Prisma & Drizzle ORM, Redis, serverless & edge functions, ETL & data migration, third-party service & payment/shipping/tax integration

Frontend: HTML5, CSS3/SCSS, JavaScript (ES6+, modern vanilla, Web Components), jQuery, TypeScript, React 19 (hooks, Server Components), Next.js, Tailwind CSS v4, TanStack Query, Vite, responsive & cross-browser development, semantic HTML & WCAG accessibility

AI-Assisted Development: Claude Code, GitHub Copilot, Cursor, ChatGPT — for code review, refactors and docs; LLM API integration (Anthropic, OpenAI), Model Context Protocol (MCP), AI-driven product recommendations & content workflows in commerce

Performance & Conversion: Core Web Vitals (LCP, CLS, INP), site-speed optimization, SEO & CRO, checkout/post-purchase experience

Databases & Cloud: PostgreSQL, MongoDB, MySQL (relational database design & optimization), AWS (EC2, S3, IAM), Git/GitHub/Bitbucket, CI/CD basics

Process: Code review, testing, production debugging, independent ownership in fast-paced environments

HIGHLIGHTS

- Built and maintained 30+ eCommerce sites end to end across Shopify, WordPress, and BigCommerce for international brands and retailers, including Allbirds, Everlane, and Filson.
- Expert-level Liquid templating and custom section/component development; strong track record migrating sites from other platforms onto Shopify.
- Ships end-to-end: custom sections & theme build → Storefront GraphQL API & app integration → performance/SEO/CRO tuning → QA and release.
- Strong communicator across design, marketing, and technical stakeholders — comfortable escalating concerns and presenting solutions clearly.
